

What to expect at your evaluation

A functional vision evaluation is relaxed and hands-on. There are no wrong answers, and children usually find the activities fun. Here's how it goes, step by step.

- 1 Book and fill out the forms**
Call (561) 462-1245 or book at visionlearncenter.com. We'll send a short symptom questionnaire and history form to complete before the visit.
- 2 The evaluation (1 to 2 hours)**
The doctor measures how the eyes team, focus and track, and how the brain uses what the eyes see: visual processing, visual memory and eye-hand skills. About 1 hour for a Binocular Vision Assessment (eye turns, lazy eye, concussion), or about 100 minutes for a Developmental Vision Evaluation for children. Parents are welcome in the room.
- 3 Results the same day**
The doctor explains what was found and whether vision therapy is recommended. Our care coordinator then walks you through next steps, scheduling and payment options before you leave.
- 4 A written report**
With your permission, we send the findings to the provider who referred you, and school accommodations if you need them for a 504 plan or IEP.

What to bring

- Current glasses or contacts
- Recent eye exam records
- School reports, IEP or 504 plan
- Therapy or psychology reports
- Your questions and concerns

Paying for care

We are out-of-network and give you the paperwork to ask your plan for reimbursement. HSA, FSA, CareCredit, payment plans and the Florida FES-UA scholarship are accepted.
