

Referring a patient to us: the whole process on one page

1. Who the doctor may send

Convergence insufficiency or focusing problems · eye tracking problems · amblyopia or strabismus at any age · symptoms since a concussion · a prism prescription that keeps increasing · reading or learning complaints with healthy eyes. Children and adults.

2. What to send us

The referral slip or online form, and the last exam note if you can: acuity, prescription, cover test, near point of convergence and any binocular testing. It saves the patient repeat tests.

3. Three ways to refer. Pick the easiest.

Online

visionlearncenter.com or the QR code. We confirm with your office when the patient is booked.

Fax

Fax the referral slip and exam note to (561) 462-1245.

Hand it to the patient

Give them the patient handout with the tear-off slip. They call (561) 462-1245 or book online.

☐ Check "Please call my patient" on the slip or form and we call the patient to schedule within 1 business day. The patient doesn't have to remember to call us.

4. What happens next

Booked: your office gets a confirmation.

Evaluated: a full binocular vision evaluation.

Reported: the doctor gets a written report within 7 days.

When a patient asks "Is it covered?"

"They are out-of-network and give you the paperwork to ask your plan for reimbursement. HSA, FSA, CareCredit, payment plans and FES-UA scholarships are accepted. Costs are explained at the evaluation."

Not for us, send same day to medical care: sudden new double vision, a new eye turn, eye pain, or vision loss.

Questions? Call (561) 462-1245 and ask for Jada, our referrals contact. Dr. Murray is glad to talk with your doctor about any patient.
