

Your eye doctor recommends a binocular vision evaluation

Your eyes are healthy and your prescription is right. This evaluation looks at something else: how your two eyes team, focus and move together. It's for children and adults.

Check anything that sounds familiar

- | | |
|---|---|
| ☐ Eye strain or headaches with close work | ☐ Double vision, especially when tired |
| ☐ Words move, blur or run together | ☐ Losing your place when reading |
| ☐ An eye that turns or drifts | ☐ Lazy eye (amblyopia), at any age |
| ☐ A prism prescription that keeps increasing | ☐ Trouble with depth: parking, pouring, sports |
| ☐ Symptoms since a concussion | ☐ Reading is slow or tiring |

Your eye doctor stays informed

We evaluate and, if needed, treat the eye teaming problem. Your eye doctor gets a written report within 7 days.
